

## Product description

The baby EvacBCOT is designed for the safe evacuation of premature and new born babies from hospital maternity wards and special care baby units in the event of a fire or similar emergency. The EvacBCOT allows the baby to be carried to safety along with its medical Oxygen cylinder if required whilst having the rescuers arms and hands free; to tend to the child, open doors or negotiate stairwells safely. Once evacuated to a safe place the EvacBCOT provides a temporary safe secure enclosure, where the baby can be monitored until being transferred back into the appropriate care equipment for their condition.

*Le bébé EvacBCOT est conçu pour l'évacuation en toute sécurité des prématurés et des nouveau-nés des maternités et des unités de soins spéciaux pour bébés en cas d'incendie ou d'urgence similaire. L'EvacBCOT permet au bébé d'être transporté en toute sécurité avec son cylindre d'oxygène médical si nécessaire tout en ayant les bras et les mains des sauveteurs libres; s'occuper de l'enfant, ouvrir des portes ou négocier des cages d'escalier en toute sécurité. Une fois évacué vers un endroit sûr, l'EvacBCOT fournit une enceinte sécurisée et temporaire, où le bébé peut être surveillé jusqu'à ce qu'il soit transféré dans l'équipement de soins approprié à son état.*

## Features

- Wall mounted wipe clean compact storage bag.
